

Clean Solution –

ColonClean ^{OT}_{PATENT}

SWISS DESIGN
SWISS MADE
SWISS QUALITY

*Portable water colonic irrigator without temperature display
For daily rectal hygiene at home or in a medical environment
By the user.*

Applications:

Advanced colon and intimate care for use in the home, medical environment and when travelling. A healthy, regular bowel movement prevents constipation and the problems associated with a build up of toxins in the body. It reduces the cost of laxatives and the side effects associated with such drugs. Private colonic hygiene and day to day care activities both get a completely new perspective.

How it works/

System requirements:

The irrigator can be used on any toilet, alone or with slight assistance from a carer. The only requirements

are a water connection with a single lever mixer and a toilet. A water flow regulator on the device itself allows individually tailored water flow at all times to ensure gentle, painless evacuation.

The **ColonClean OT** device is automatically cleaned by the outgoing water flow.

Its extreme ease of use and handy size make the **ColonClean OT** ideal for taking on your travels or for house calls.

Can be permanently installed in the bath at any time.

ColonClean OT

PATENT PENDING

Colonic irrigation with the handy ColonClean OT is easy to carry out yourself at home. IN care environments such as old people's homes or disabled care, it only takes a little help from a carer. This saves time and gives the patient a little privacy.

The **ColonClean OT** irrigator is connected to an existing water supply, close to a toilet, with an ordinary shower hose (variable lengths), available from most retailers. (adapter, quick connector)
A single lever mixer tap is required to keep the water temperature at a constant body temperature. The water flow can be adjusted at any time using the water flow regulator on the handheld device. The water flow should never be adjusted during the irrigation process, as this will alter the temperature on the single lever mixer tap!

The warm, powerful water flow in the perineal, anal and rectal area works like a gentle massage and muscle tension is released. Gentle, painless evacuation directly into the toilet follows.

The **ColonClean OT** irrigator cleans itself automatically with the continual flow of water. It is impossible for any waste to flow back into the water supply system.

Water irrigation using the **ColonClean OT** prevents constipation and the resulting serious health problems. This gentle form of rectal cleansing relaxes, eases and promotes your health.
